

**exo-R-MECAMYLAMINE ENANTIOMER FORMULATION AND USE IN
TREATMENT**

5

ABSTRACT

A pharmaceutical composition includes a therapeutically effective amount of exo-R-
10 mecamylamine or a pharmaceutically acceptable salt thereof, substantially free of exo-S-
mecamylamine in combination with a pharmaceutically acceptable carrier. Preferably the
amount is about 0.5 mg to about 20 mg. Medical conditions are treated by administering a
therapeutically effective amount of exo-R-mecamylamine or a pharmaceutically acceptable salt
thereof, substantially free of its exo-S-mecamylamine, said amount being sufficient to ameliorate
the medical condition. The medical conditions include but are not limited to substance addiction
(involving nicotine, cocaine, alcohol, amphetamine, opiate, other psychostimulant and a
combination thereof), aiding smoking cessation, treating weight gain associated with smoking
cessation, hypertension, hypertensive crisis, Tourette's Syndrome and other tremors, cancer (such
as small cell lung cancer), atherogenic profile, neuropsychiatric disorders (such as bipolar
disorder, depression, an anxiety disorder, schizophrenia, a seizure disorder, Parkinson's disease
and attention deficit hyperactivity disorder), chronic fatigue syndrome, Crohn's disease,
autonomic dysreflexia, and spasmogenic intestinal disorders.
